cropWise Connect

Problem Statement

I-10

To provide a innovative solution on agriculture domain like crop cultivation, maintenance, monitoring IoT, AI, ML, Connectivity & Sensors

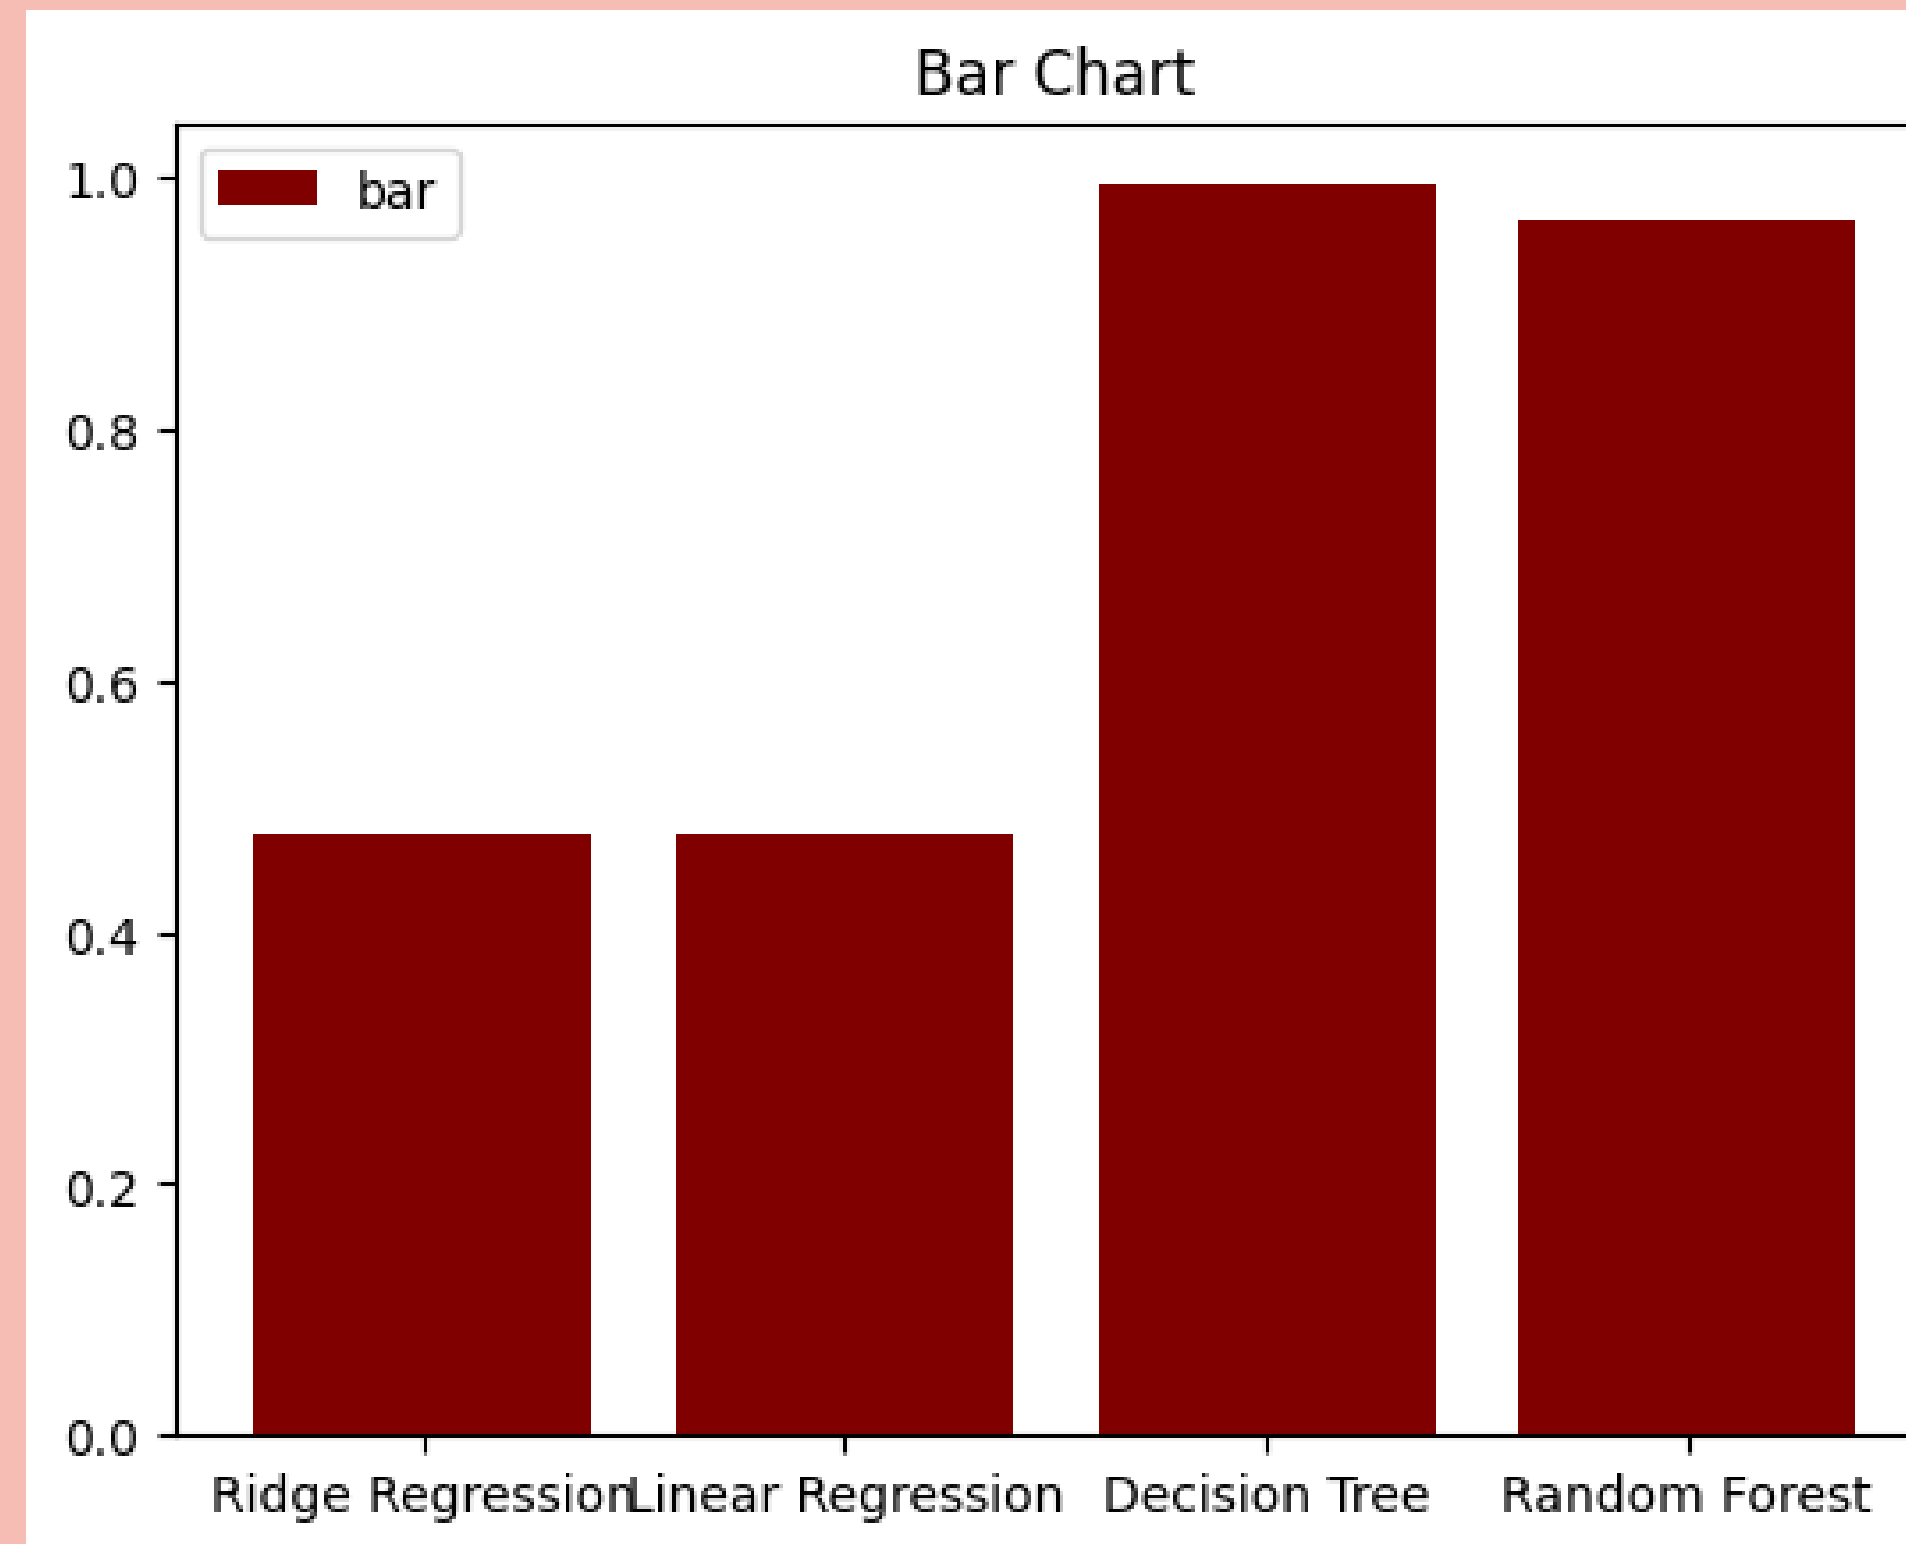

Abstract

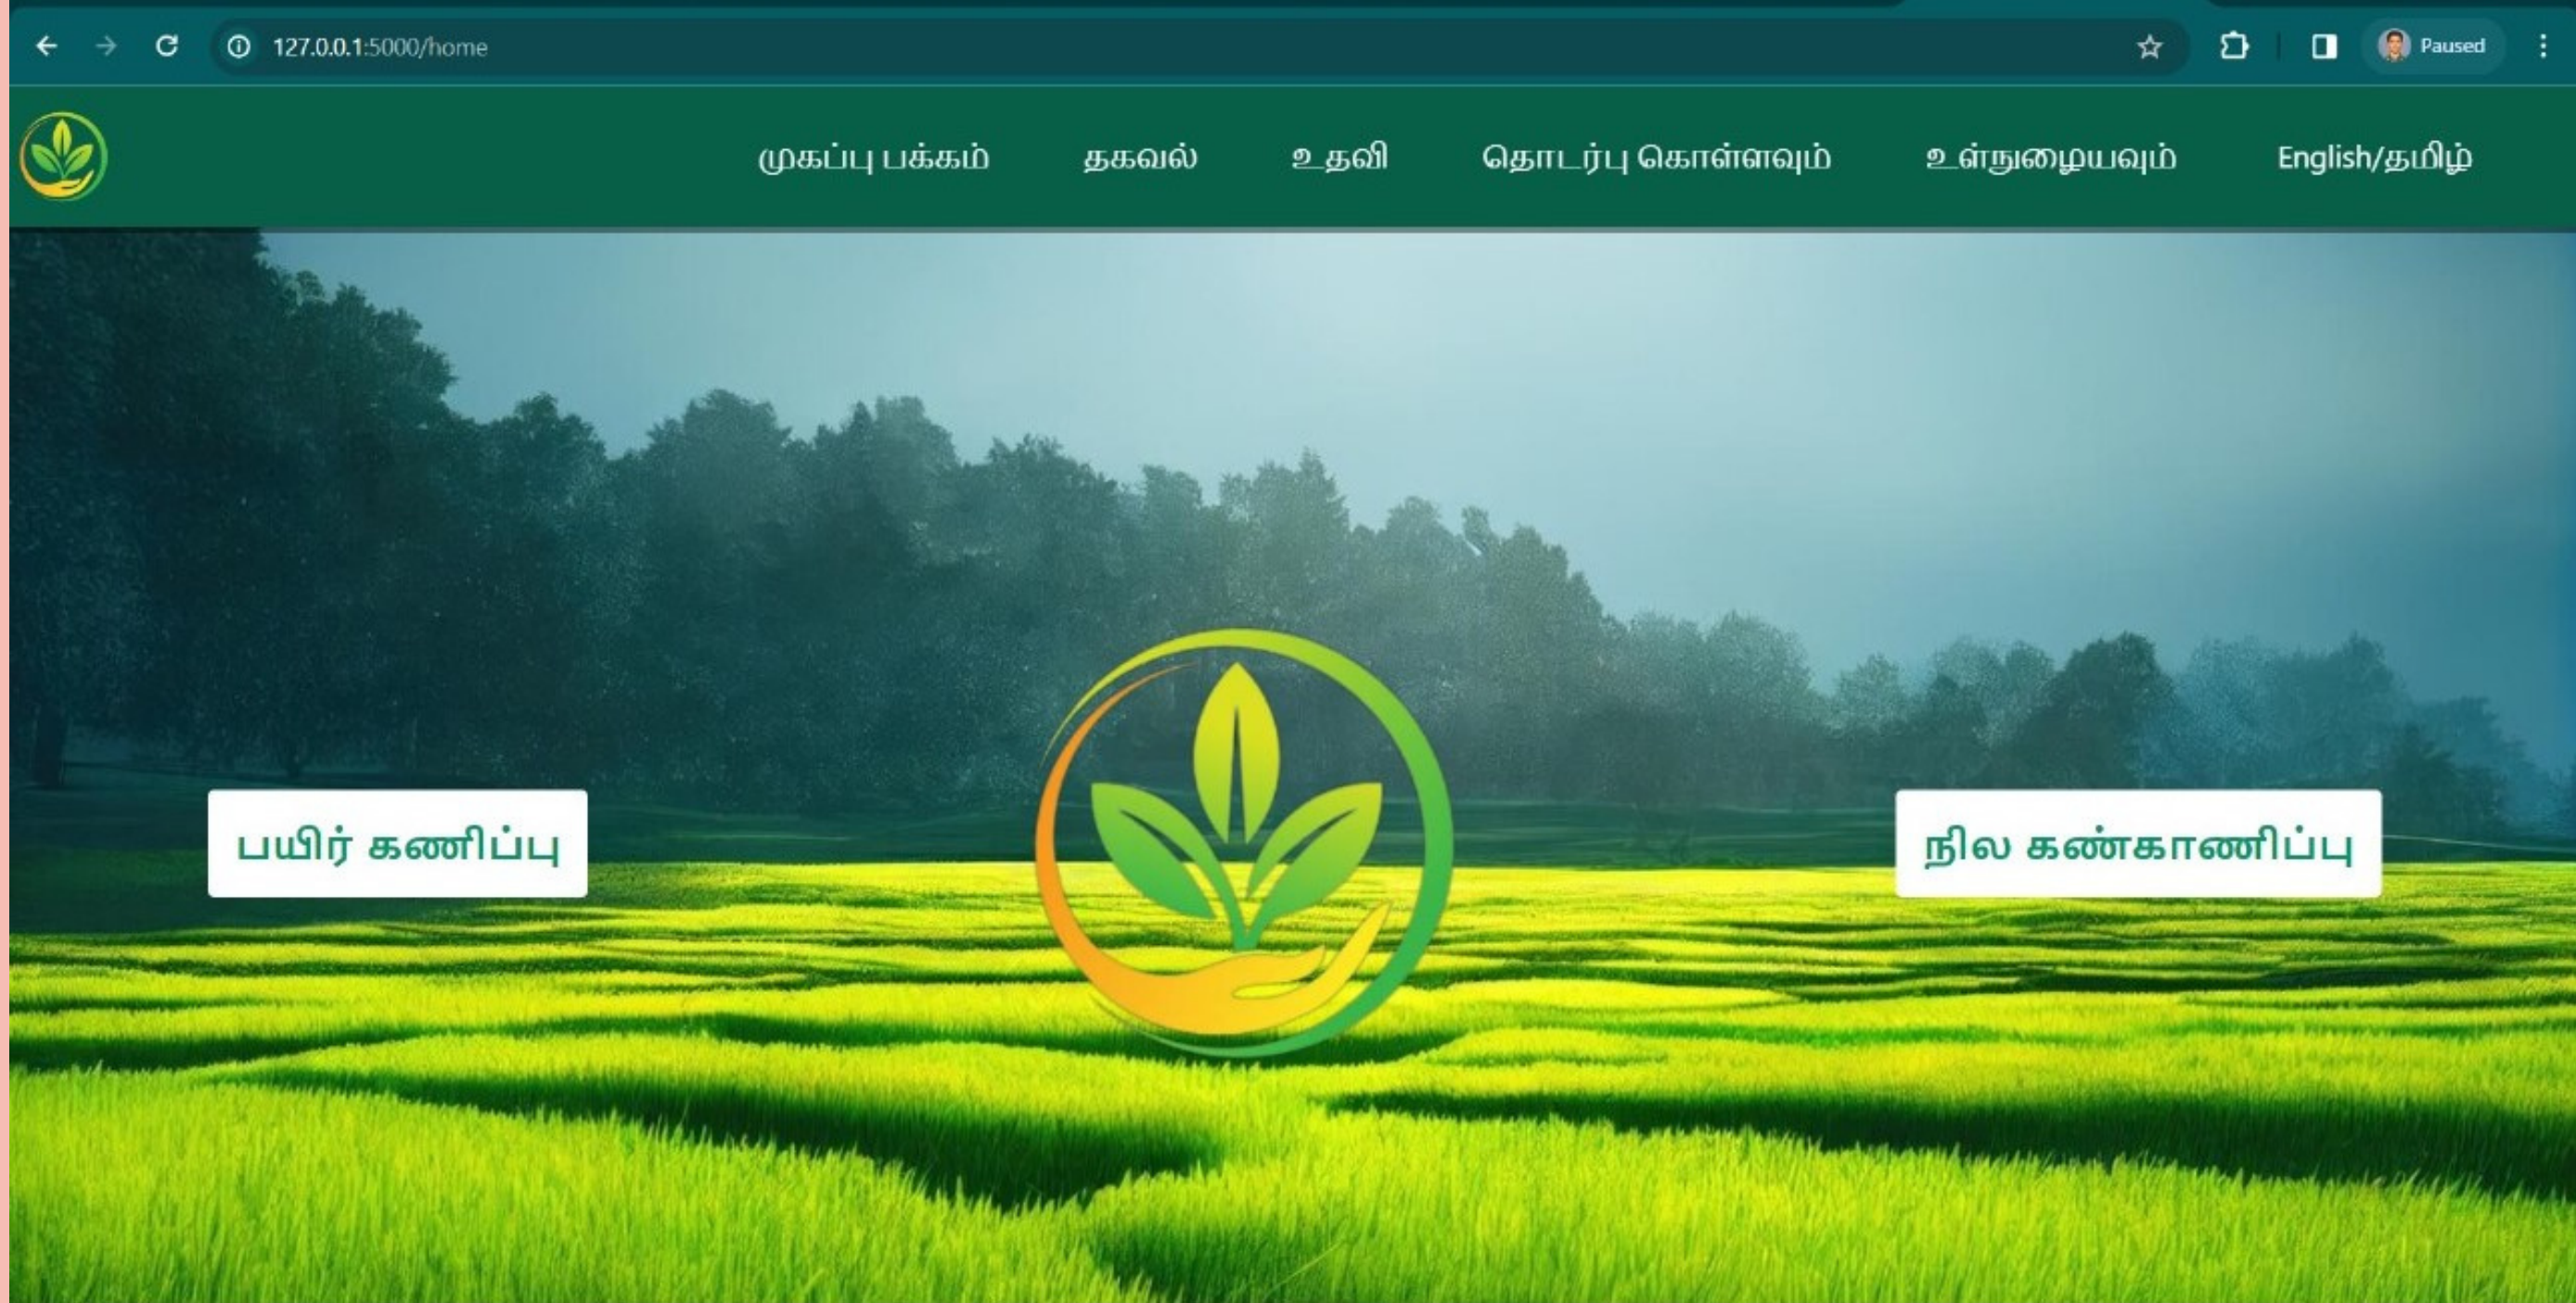

"CropWise Connect" is a pioneering agricultural solution that merges IoT and AI to address modern agriculture challenges. The project utilizes advanced sensors and connectivity to create a comprehensive system for monitoring and managing crop cultivation. With real-time data on environmental factors, farmers can make informed decisions to optimize resources and enhance crop yield. Key features include continuous monitoring, AI analytics for crop health insights, seamless connectivity, and remote management capabilities. CropWise Connect aims to revolutionize agriculture by promoting sustainable and efficient crop cultivation through integrated and intelligent technology solutions.
